## Solar Photovoltaic (PV) or Water Heating (SHW) Installation

(1) Provide the following documents with your application, where applicable:

- Product listing** from supplier(s) verifying that all components to be installed are **CAN/ULC certified**.
- Manufacturer specifications** for PV and/or SHW components (i.e. design and installation requirements).  
\*\*\* Note that SHW systems must be installed in accordance with Saskatchewan Plumbing Regulations.  
**Battery storage**, if applicable, must indicate ventilation & space clearance requirements.
- Electrical line diagrams** for solar PV installations. (NOTE: **Commercial installations require P.Eng. seal**)  
\*\*\* Note that all solar PV installations require an **electrical permit** from SaskPower.
- Roof truss designs** (engineer-stamped) or letter from a Structural Engineer (project-specific).  
**Engineer designs or letter** must indicate: (a) that their review conforms to NBC 2015 - Part 4, (b) anticipated dead loads (e.g. weight of panels, supports and racking), (c) anticipated live loads (e.g. snow and wind loads for the area), (d) maximum anticipated point load on framing members, (e) maximum panel array height above surface of roof (re: uplift and forces on mounting attachments), and (f) additional structural information relevant to the project.
- Roof-mount plan and layout**, indicating: (a) roof surface type and dimensions, (b) panel and anchor layout, noting dimensions, spacing and weight, (c) method of attachment, (d) distance between roof surface and underside of panels, if parallel-mounted, (e) maximum height above roof ridge, if tilt mounted, (f) racking/rail lengths and details (g) flashing and sealant type, (h) provisions for fire fighting, and (i) additional structural information relevant to the project.
